Meet Tokyo's Fintech Innovators

Bold ideas. Smart solutions. Discover the Tokyo-based startups opening new possibilities in finance.

Innovation starts here.

Curvegrid, Inc.

Contacts: William Metcalfe
E-mail: contact@curvegrid.com
Phone: +81 3 6555 8564

Curvegrid is a Tokyo based digital asset technology company that helps enterprises securely integrate digital assets into their financial operations. Our platform enables treasury management, stablecoin payments, staking, and tokenization through secure MPC wallet technology and blockchain infrastructure. Serving financial institutions, fintech companies, global businesses, and Web3 companies, we deliver secure, scalable solutions that bridge blockchain technology with real world financial services.

Datachain, Inc.

Contacts: Ed Gemmal
E-mail: contact@datachain.jp
Phone: +81 70 1326 7569

Founded in 2018, Datachain, Inc. builds blockchain solutions for institutional digital asset adoption. It runs joint initiatives with financial institutions including Japan's three megabanks, JCB, and Swift. Its products include Datachain Wallet, a Passkey-secured multisig enterprise wallet, and KuraPrivacy, enabling on-chain privacy with selective disclosure for audits. It also works on IBC-based cross-chain technology and tokenized deposits. Datachain aims to build globally interoperable financial infrastructure on blockchains.

Soramitsu CBDC Co., Ltd.

Contacts: Chihiro Kato
E-mail: kato@soramitsu.co.jp
Phone: +81 90 7590 7590

Soramitsu CBDC builds digital financial infrastructure using Hyperledger Iroha, its original blockchain technology. Working with governments and central banks, we focus on CBDCs, stablecoins and digital savings bonds. We developed Bakong with Cambodia's central bank to advance financial inclusion. Alongside pilots in the Pacific Islands and Pakistan, we are exploring opportunities in Bangladesh. Combining Japanese expertise with global partnerships, we deliver secure, inclusive payment infrastructure for sustainable growth.

Sustainable Lab, Inc.

Contacts: Kotaro Takahashi
E-mail: k.takahashi@suslab.net
Phone: +81 80 7169 1641

Sustainable Lab provides an AI-powered platform for collecting, structuring and analyzing non-financial and ESG data, supporting corporate disclosure, supply-chain management and financial institutions' portfolio monitoring. At SFF 2026, as part of the SAFE consortium, we will showcase a Central Repository concept that standardizes and aggregates ESG data from SMEs across ASEAN. Together with our partner company, Pantas, we will demonstrate an integrated flow from data collection and GHG calculation to reporting and use by financial institutions and corporates.

Trust Co., Ltd.

Contacts: AI & Data Division
E-mail:contact-tlanp-sales@trust-partner.co.jp

Trust Co., Ltd. is a professional services firm shaping the future of finance through technology and community. We help financial institutions accelerate digital transformation with deep expertise in AI, data, and IT consulting. Our services span AI strategy, data and generative AI solutions, IT strategy and architecture, data platforms, system modernization, and business transformation. We also foster industry collaboration by supporting financial associations and communities, driving transformation and new value creation.
